

## eco PAINT STRIPPA-paint remover

### Product Description

Only Green "Paint Strippa" can safely remove most commonly used paints. Oil based, Acrylic, Polyurethane, Varnishes, Lacquers, and most Anti-fouling , as used on boats.

When OG "Paint Strippa" is applied the safe solvents start to break down the paint and its link with the surface to which it has been applied. The clay matrix then produces an Hydraulic action ,pulling the paint towards itself.

**To enhance the action of the OG "Paint Strippa", it is advised to use a light black plastic membrane over the area being worked. This speeds up the action, also the clay matrix adheres to the plastic, making disposal a safe and clean operation.**

**Please note! OG "Paint Strippa" is 100% degradable in water, therefore do not use in wet conditions.**

Also OG "Paint Strippa" compared to other aggressive chemical based strippers will take longer to work, we therefore suggest that a test area be used prior to commencement of the full job. This will provide a time factor for the task ahead.

Full de-lamination onto the plastic membrane will not occur if you are trying to remove more than two coats of paint in one operation.

OG "Paint Strippa" will continue to work as long as it is moist and can soften up to 20 coats of some paints at one time. Therefore on completion of your job always neutralise the surface with plain water!

**Paint Strippa**  
A Safe to use  
Paint Strippa that  
is safe and effective.

### Comparison With Methylene Chloride & other chemical paint strippers:

#### ADVANTAGES

1. SAFER TO USE
2. NO HARMFUL ADDICTIVE ODOUR
3. SAFE CONTAINMENT AND DISPOSAL
4. VERY LOW TOXIC
5. ENVIRONMENTALLY FRIENDLIER
6. NEUTRALISED WITH WATER
7. SAFE & EASY CONTAINMENT OF SPILLS
8. WILL BREAK DOWN IN SOILS
9. NON-FLAMABLE
10. CAN BE USED SAFELY INDOORS AS WELL AS OUTDOORS
11. WILL SOFTEN BITUMASTIC GLUES
12. WILL NOT STAIN
13. WILL NOT DAMAGE GELCOAT ON FIBREGLASS BOATS
14. WILL EASILY REMOVE GRAFFITI  
(refer special product detail for Graffiti removal)
15. WILL REMOVE NON-REMOVABLE MARKER FROM HARD SURFACES.

#### DISADVANTAGES

1. TAKES LONGER TO WORK
2. WILL NOT WORK ON EPOXY TYPE PAINTS ,  
OR ON BAKED ENAMELS.
3. CAN NOT BE USED IN WET AREAS
4. LOW TEMPERATURES SLOW DOWN IT'S  
REACTION TIME.

**"PLEASE NOTE, ALWAYS DISPOSE ANY WASTE MATERIALS AS PER YOUR LOCAL BODY REGULATIONS, OG "PAINT STRIPPA" IS SAFE, BUT THE PAINT YOU ARE REMOVING MAY VERY WELL BE LEAD BASED, OR OF A TOXIC NATURE!"**

### Technical Data:

Many questions have been asked about OG "Paint Strippa", and to answer some of these we have prepared the following data.

**WHAT IS OG "Paint Strippa" AND WHY SHOULD WE USE IT ?** World wide there is a movement away from products that have an adverse affect on our environment. Although our generation is not going to feel the immediate impact of our efforts to keep a clean environment, be assured our future generations will thank us.

OG "Paint Strippa" is one of the new generation products that has been developed to meet all the criteria involved in a Bio-Degradable and Environmentally friendlier Paint Stripper.

OG "Paint Strippa" contains none of the aggressive chemicals as used in many of the usual paint strippers, it has been developed using Safe Bio-Degradable solvents with an added cosmetic type clay matrix. The result is a product with the texture of "Tooth Paste" with a pleasant **Non-Toxic odour**, and is **Non Flammable**.

If OG "Paint Strippa" is accidentally spilt, it is easily collected, however any residue can be neutralised with water , and will very quickly break down to its natural state without causing any damage to the environment.

### Technical Data:

Ingredients	Mixed vegetable Ester, N Pryol Butyl Glycol Ether, Dobanic Acid
Shelf Life	3years +
Working Time	30minutes to 12 Hours
Coverage	5-8 sq mtrs / ltr
Thinning	Do Not Thin
Cleanup	Warm soapy Water
Pack sizes	1 litre, 4Litre and 10 Litre
